

## Harmony or discord? Working through issues of conflict, change and control in the local church.

*We know that our local churches should manifest the righteousness, peace and joy of the gospel. But all too often our experience is one of conflict, disharmony and the pain of strained if not broken relationships. Why do conflicts arise? How do they relate to the issues of change and control? As leaders and church members, how do godly character, biblical wisdom and a gospel mindset help us avoid unnecessary conflict and better navigate the unavoidable conflicts? These are vital matters for healthy and harmonious church life.*

*Steve Midgley will be leading our next Partnership Training Day, opening up God's Word and helping us think through these issues in a very practical way. Steve is the Senior Pastor of Christ Church, Cambridge and the Executive Director of Biblical Counselling UK. He worked as a psychiatrist in London before going on to serve full time in church ministry.*

**Join us for this day aimed at both church leaders and congregation members who long to see the peace of Christ ruling in our hearts and in our churches.**
